### **New photovoltaic system on the roof of the Old Welding Shop**

**Schrobenhausen, Germany** – In the context of growing environmental awareness and ambitious climate targets, renewable energies are gaining in importance – especially solar energy. Recently, BAUER AG has put a new photovoltaic system into operation at the Schrobenhausen site. Gerhard Winter, Head of Facility Management at Bauer, explains: “The planning of such a system in Schrobenhausen has been under discussion for a long time. However, the roof of the Old Welding Shop had to be renovated before installation could begin.” So two birds were killed with one stone.

Specifically, 464 modules are now installed on the roof of the Old Welding Shop, each generating 430 Wp. This corresponds to a total output of 199.52 kWp – enough to cover the permanent power requirements of the Bauer headquarters, i.e. the electricity that is needed at least 24 hours a day. In total, Bauer has invested around 180,000 euros in the new system. It is expected to pay for itself in around 6.5 years and produce around 220,000 kWh of electricity per year. Incidentally, Bauer has also been producing green electricity at its Edelshausen plant with two solar power systems since 2008. And when the new administration building was constructed in Schrobenhausen, sustainability was also taken into account: geothermal energy is used to heat the building in winter and cool it in summer.

**About Bauer**

The BAUER Group is a leading provider of services, equipment and products dealing with ground and groundwater. The Group can rely on a worldwide network on all continents. The Group's operations are divided into three forward-looking segments with high synergy potential: Geotechnical Solutions, Equipment and Resources. Bauer profits enormously from the collaboration of its three business segments, enabling the Group to position itself as an innovative, highly specialized provider of products and services for demanding projects in specialist foundation engineering and related markets. Bauer therefore offers suitable solutions to the world's greatest challenges, such as urbanization, the growing infrastructure needs, the environment, as well as water. The BAUER Group was founded in 1790 and is based in Schrobenhausen, Bavaria. In 2023, it employed about 12,000 people and achieved total Group revenues of EUR 1.8 billion worldwide.
